1 Categorization in multiple category systems
Jean-Michel Renders, Eric Gaussier, Cyril Goutte, Francois Pacull, Gabriela Csurka
June 2006 **ICML '06:** Proceedings of the 23rd international conference on Machine learning
Publisher: ACM

Full text available: 🔲 pdf(180.24 KB)   Additional Information: full citation, abstract, references, index terms

We explore the situation in which documents have to be categorized into more than one category system, a situation we refer to as *multiple-view categorization*. More particularly, we address the case where two different categorizers have already ...

2 Learning rules with negation for text categorization
Pasquale Rullo, Chiara Cumbo, Veronica L. Policicchio
March 2007 **SAC '07:** Proceedings of the 2007 ACM symposium on Applied computing
Publisher: ACM

Full text available: 🔲 pdf(193.37 KB)   Additional Information: full citation, abstract, references, index terms

This paper describes Olex, a novel method for the automatic construction of rule-based text classifiers. Olex relies on an optimization algorithm whereby a set of (both positive and negative) discriminating terms is generated for the category being learned. ...

Keywords: classification rules, negative features, text classification

3 Creating MAGIC: system for generating learning object metadata for instructional content
Ying Li, Chitra Dorai, Robert Farrell
November 2005 **MULTIMEDIA '05:** Proceedings of the 13th annual ACM international conference on Multimedia
Publisher: ACM

Full text available: 🔲 pdf(197.55 KB)   Additional Information: full citation, abstract, references, cited by, index terms

This paper presents our latest work on building a system called MAGIC (Metadata Automated Generation for Instructional Content) that will automatically identify segments and generate critical metadata conforming

1   Pragmatic text mining: minimizing human effort to quantify many issues in call logs
George Forman, Evan Kirshenbaum, Jaap Suermondt
August 2006 **KDD '06:** Proceedings of the 12th ACM SIGKDD international conference on Knowledge discovery and data mining
Publisher: ACM

Full text available: 📄 pdf(852.08 KB)

Additional Information: full citation, abstract, references, cited by, index terms

We discuss our experiences in analyzing customer-support issues from the unstructured free-text fields of technical-support call logs. The identification of frequent issues and their accurate quantification is essential in order to track aggregate costs ...

Keywords: applications, log processing, quantification, supervised machine learning, text classification, text mining

2   Harnessing the Expertise of 70,000 Human Editors: Knowledge-Based Feature Generation for Text Categorization
Evgeniy Gabrilovich, Shaul Markovitch
October 2007 **The Journal of Machine Learning Research**,   Volume 8
Publisher: MIT Press

Full text available: 📄 pdf(369.02 KB)

Additional Information: full citation, abstract, index terms

Most existing methods for text categorization employ induction algorithms that use the words appearing in the training documents as features. While they perform well in many categorization tasks, these methods are inherently limited when faced with more ...

3   Creation of an expert witness database through text mining
Christopher Dozier, Peter Jackson, Xi Guo, Mark Chaudhary, Yohendran Arumainayagam
June 2003 **ICAIL '03:** Proceedings of the 9th international conference on Artificial intelligence and law
Publisher: ACM

Full text available: 📄 pdf(244.73 KB)

Additional Information: full citation, abstract, references, cited by
